SUMMARY

I'm a Software Engineering student currently pursuing my BSc, and I love building software that solves real problems. As a full-stack developer, I enjoy both the logic of backend systems and the creativity of designing user experiences. When I'm not coding, you'll often find me playing chess, exploring new places, or diving into the fascinating world of blockchain technology. I'm excited to grow as a software engineer, collaborate with great teams, and contribute to meaningful projects.

CO-CURRICULAR ACTIVITIES

, APU Blockchain and Cryptocurrency Club

August 2024 - Present

- Role: Developer Relations and Web Developer, APU Blockchain and Cryptocurrency Club
- Collaborate with Web3 companies to organize workshops, bootcamps, and hackathons.
- Facilitate student learning in blockchain and cryptocurrency technologies.
- Contribute to the development and maintenance of the club's website.
- Please make sure the website effectively communicates initiatives and engages the community.

Beyond Software

March 2024- September 2024

- Developing full-stack applications using the MERN stack (MongoDB, Express.js, React, Node.js). • Designed intuitive user interfaces and implemented robust backend systems with seamless integration. • Gained experience in client communication, agile workflows, and delivering scalable solutions tailored to business needs. • It strengthened technical skills and team collaboration through hands-on project development.
-

EDUCATION

Bachelor's of Science in Software Engineering (Hons)

March 2023 - Present

PROJECT

News Portal

- Developed a full-stack news portal using next.js, express.js, Firebase Authentication, and Tailwind CSS.
- Designed a user-friendly interface for seamless browsing and reading experiences.
- Integrated secure authentication and real-time data updates using Firebase.
- Enabled content management for administrators and interactive features for users.

ERC721

- Developed and deployed ERC-721 tokens on the Ethereum blockchain for unique digital assets.
- Implemented secure smart contracts for minting, ownership, and transfers.
- Gained experience with Solidity and Web3.js while adhering to ERC-721 standards.

ADDITIONAL INFORMATION

- **Technical Skills:** Front End Web Development, HTML, CSS, javascript, Express.js, MongoDB, Next.js, Microsoft 365, Microsoft SQL Server, Search Engine Optimization, python, Java
- **Specializations:** Business Development, Business Planning, Client relationships, Cold Calling, Customer Relationship Management (CRM), Customer Service, Interpersonal Communications, Strategic planning
- **Languages:** Bengali - native Proficiency, English - Proficiency, Hindi - Proficiency
